

Zeddrix Fabian

Full-Stack Web App Developer

Full-stack web app developer shipping production apps with AI-accelerated workflows. I have been developing since 2018 and I enjoy turning complex requirements into simple user experiences with reliable engineering underneath. I like to work smart, not hard. So I utilize AI tools like Cursor and Claude Code to move quickly without sacrificing quality, using the Acceptance Test-Driven Development (ATDD) approach.

CORE SKILLS

AI-ACCELERATED DELIVERY

Cursor IDE · Anthropic Claude
Claude Code ·

FRONTEND FRAMEWORKS

Svelte · SvelteKit · Angular · Angular
React · React SSR & PWA
Native · Next.js ·

FRONTEND LIBRARIES & PATTERNS

Redux · Context bootstrap ·
API · RxJS · ng- Chart.js

LANGUAGES

TypeScript ·
Python · Vanilla JS

BACKEND & ARCHITECTURE

Node.js (Express, Strapi · Firebase ·
NestJS) · NestJS · Swagger
Django · BFF · (OpenAPI) · nginx

DATA & STORAGE

Supabase · MySQL · Redis ·
PostgreSQL · AWS S3
MongoDB ·

STYLING & UI

CSS · SASS · Material UI ·
Tailwind CSS · Bootstrap

TESTING

Jest · Vitest · Cypress ·
Supertest · React Playwright ·
Testing Library · Storybook

DEVOPS, PLATFORMS &

WORKFLOW

Cloudflare · PayPal · AWS EC2
Docker · Git · · Lemon Squeezy
GitHub · GitHub · Yarn ·
Actions · Nx · WordPress ·
DigitalOcean · Namecheap
Render · Stripe ·

PROFESSIONAL DEVELOPMENT

Modern JavaScript From The Beginning

Udemy · Nov 2020

ReactJS Front to Back

Udemy · Jan 2021

CSS – The Complete Guide 2021 (incl. Flexbox, Grid & Sass)

Udemy · Feb 2021

Node.js API Masterclass With Express & MongoDB

Udemy · Mar 2021

MERN eCommerce From Scratch

Udemy · Apr 2021

LANGUAGES

Tagalog (Native)
English (Professional)

PROFESSIONAL EXPERIENCE

Jan 2026 – Present	Sole builder — Queue Independent products Shipped queue.place MVP+ PWA for walk-ins, bookings, operations, billing, and owner/admin tooling with Supabase and Cloudflare.
Jun 2026 – Present	Full-stack contributor — Manatal Cooperative Codefrost · client Returned to extend Manatal Cooperative member PWA and Django API delivery flows for production cooperative operations.
Jun 2026 – Present	Sole builder — MERN's Shop (modernization) Independent products Modernized the 2021 Udemy storefront with TypeScript, Express 5, React 19, PayPal checkout, guest/registered order flows, ATDD (Playwright/Vitest), PWA, CI, and Render deployment.
Aug 2025 – May 2026	Full-stack contributor — Adverio Tools Codefrost · client Delivered Angular and Django tooling for Adverio client workflows with Docker, Stripe, and Redis-backed integrations.
Sep 2025 – Dec 2025	Full-stack contributor — Bolt to GitHub Codefrost Built Bolt to GitHub automation for Codefrost product workflows alongside parallel client deliveries.
Sep 2025 – Oct 2025	Full-stack contributor — AnswerIQ Independent products · personal client Contributed to AnswerIQ multi-tenant SaaS: Shopify FAQ pipeline, Stripe billing, workspace RBAC, and admin audit console.
Jan 2025 – Jul 2025	Full-stack contributor — UseDelight Codefrost · client Delivered SvelteKit extension and account flows with Stripe billing, plus Express API work for subscription reliability, admin stats, and content collections.
Jul 2024 – Dec 2024	Full-stack contributor — ArticulateLearn Codefrost Extended ArticulateLearn language-learning PWA with production features across frontend and backend surfaces.
Jan 2024 – Jun 2024	Full-stack contributor — TrulyHappy Codefrost Resumed production development on TrulyHappy PWA after returning from a career break in early 2024.
May 2021 – Oct 2021	Sole builder — JW Tabs Independent products Shipped jwtabs.app MVP for guitar and ukulele tablature with community workflows, billing, and admin moderation.
Nov 2021 – Dec 2021	Full-stack contributor — Manatal Cooperative Codefrost · client Delivered Manatal Cooperative member PWA and Django API financial request flows as first production client work.
Mar 2018 – Dec 2021	Student Web Developer (Internship) Codefrost Grew from internship into sustained production web development across Codefrost company products and client deliveries.

CLIENT WORK

Adverio Tools — Full-stack contributor (Codefrost · Adverio)

Connected scraping, AI analysis, forecasting, and proposal generation in one Amazon seller toolkit.

I helped shape workflows that combine scraping, AI analysis, forecasting, and proposal output in one system.

Angular · Node.js · Python · Django · Docker · Stripe

AnswerIQ — Full-stack contributor (AnswerIQ)

Live multi-tenant SaaS that turns PAA queries into SEO FAQ articles, publishes to Shopify, bills via Stripe, and ships an admin console with audit logs — backed by Playwright, Jest, and Vitest ATDD.

I contributed to the end-to-end SaaS across workspace isolation, the keyword-to-publish pipeline, Stripe billing, and the admin console — with Playwright journeys, integration tests, and unit coverage.

React · TypeScript · Express · PostgreSQL · Vite · Tailwind CSS

TrulyHappy — Full-stack contributor (Codefrost)

Mental wellbeing PWA with guided habits, mood tracking, missions, and subscription-ready billing.

I contributed across Angular flows and backend integrations using a BFF pattern that isolates Django and Redis services from the PWA.

Angular · NestJS · TypeScript · Python · Django · BFF

Bolt to Github — Full-stack contributor (Codefrost)

Chrome extension that intercepts Bolt.new ZIP exports and pushes projects to GitHub with PAT or App auth.

I contributed to a Manifest V3 extension that intercepts exports client-side, respects .gitignore rules, and automates GitHub pushes with diff preview and project sync.

Svelte · TypeScript · Chrome Extension (MV3) · Vite · Supabase · GitHub API

UseDelight — Full-stack contributor (Codefrost · UseDelight)

Subscription billing and content discovery across Chrome extensions, account portal, and admin surfaces.

I shipped shared SvelteKit UI patterns, subscription sync and Stripe checkout hardening on the frontend, and Express API work for billing, collections, and admin stats.

SvelteKit · Express · MongoDB · Stripe · Playwright

Manatal Coop — Full-stack contributor (Codefrost · Manatal Cooperative)

Cooperative member banking PWA with financial request workflows, offline caching, and push notifications.

I contributed to the Svelte member app and Django API — wiring financial request forms (withdrawal, transfer, express loan), shared transfer-method components, and form validation UX across light and dark themes.

Svelte · TypeScript · Django · Django REST Framework · PostgreSQL · Celery

Articlearn — Full-stack contributor (Codefrost)

Language speaking practice PWA with audio shadowing, segmented sessions, and subscription billing.

I helped establish BFF-backed practice flows and waveform-driven shadowing sessions that keep product updates fast and consistent.

Angular · NestJS · TypeScript · Python · Django · BFF

PERSONAL PROJECTS

MERN's Shop — Sole builder

Live electronics e-commerce with ~170 products, PayPal checkout, admin ops, installable PWA, and 100+ automated tests.

I built a deployable MERN app with a rich gadget catalog, PayPal checkout, httpOnly cookie auth, admin workflows, PWA + push notifications, and ATDD — acceptance tests first, then integration and unit layers, with CI gates on every push.

React · TypeScript · Express · MongoDB · Redux Toolkit · Vite

JW Tabs — Sole builder

Tablature rendering and community workflows with billing, moderation, and admin controls in one product surface.

I focused on rendering performance and moderation workflows while integrating billing and admin controls for sustainable growth.

SvelteKit · TypeScript · Python · Supabase · Cloudflare · Docker

Queue — Sole builder

Unified walk-in, booking, and operations flows in one installable PWA with billing and admin tooling.

I designed a modular PWA architecture with shared scheduling, billing, and messaging capabilities so each business mode can grow independently. Embedded Support Chat uses Groq-backed guidance to answer owner questions in context without leaving the dashboard.

SvelteKit · TypeScript · Supabase · Cloudflare · Docker · Resend
